

Solid wall insulation

Before thermal insulation

After thermal insulation

SEMPATAP THERMAL has been installed in a number of solid wall properties in Wolverhampton. The effectiveness is clearly shown on these thermal images by IRT Surveys. Their report states: "Analysis of the property after insulation reveals significantly reduced heat loss across the elevation suggesting a much more energy efficient property."

SEMPATAP THERMAL is as easy as wallpaper to apply and can be installed without having to decant tenants. It is the economical solution for insulating solid wall homes which helps lower heating bills and reduce carbon emissions.
